Good practices of pharmacovigilance units within Sudoe space

Salomé Pires Lourenço

ONCONET SUDOE network

ONCONET project overview

6 European regions:

- Catalunya
- Navarra
- Madrid
- Andalucía
- Coimbra
- Occitanie

Pyrénées
Méditerranée (Ex
Midi-Pyrénées)

ONCONET project overview

A network in oncology, constituted by
22 institutions,
co-financed by INTERREG SUDOE
Program

What is INTERREG SUDOE Programme?

One of the fifteen transnational Cooperation Programmes financed by the European Union

This programme focuses on **cooperation across borders** in **SOUTHWEST EUROPE**.

ONCONET objectives

To analyze the actions undertaken in every participating region in some focused areas:

Nutritional prevention

Diagnostic and personalized medicine

Innovative approaches in cancer treatments

Communication health systems and technology innovation

Improvement of the medical innovation ecosystem

ONCONET objectives

To analyze the actions undertaken in every participating region in some focused areas:

Diagnostic and personalized medicine

Communication health systems and technology innovation

Nutritional prevention

Innovative approaches in cancer treatments

Pharmacovigilance questionnaire

PT

ES

Centro de Farmacovigilancia de Navarra

FR

Does your Unit frequently share information with other regional pharmacovigilance units?

All regional PV units share information

Portal RAM

Registo de reações adversas a medicamentos

All regional PV units share information

Spanish
pharmacovigilance
system

agencia española de
medicamentos y
productos sanitarios

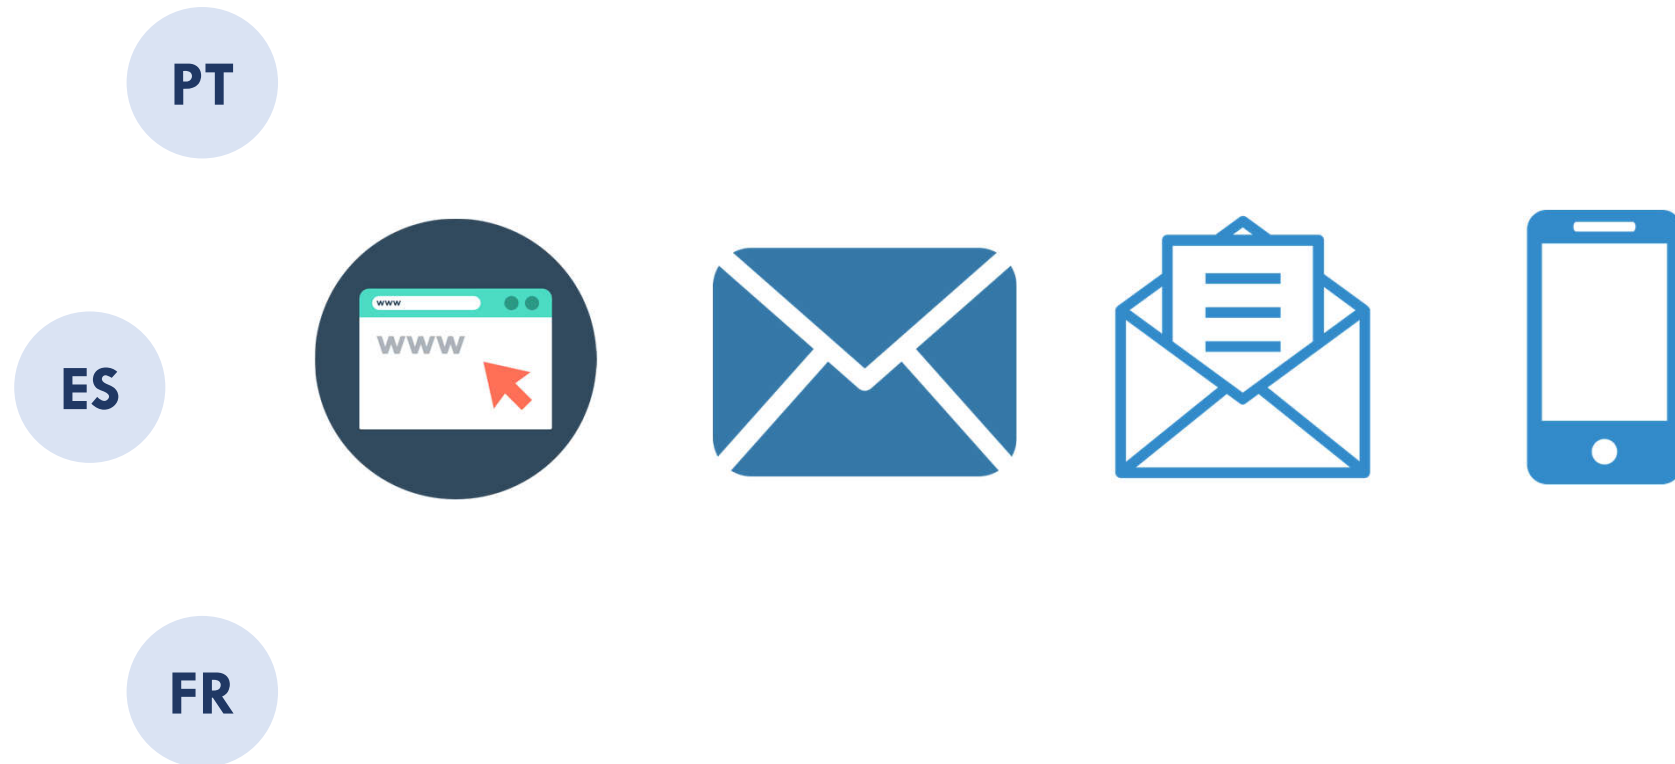

A monthly meeting is carried out in Paris.

Agence nationale de sécurité du médicament
et des produits de santé

What is the method adopted to report the SAR?

What is the method adopted to report the SAR?

FR

Are there any specific procedures to cancer related cases?

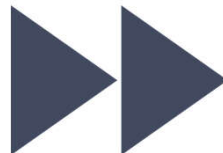

PT

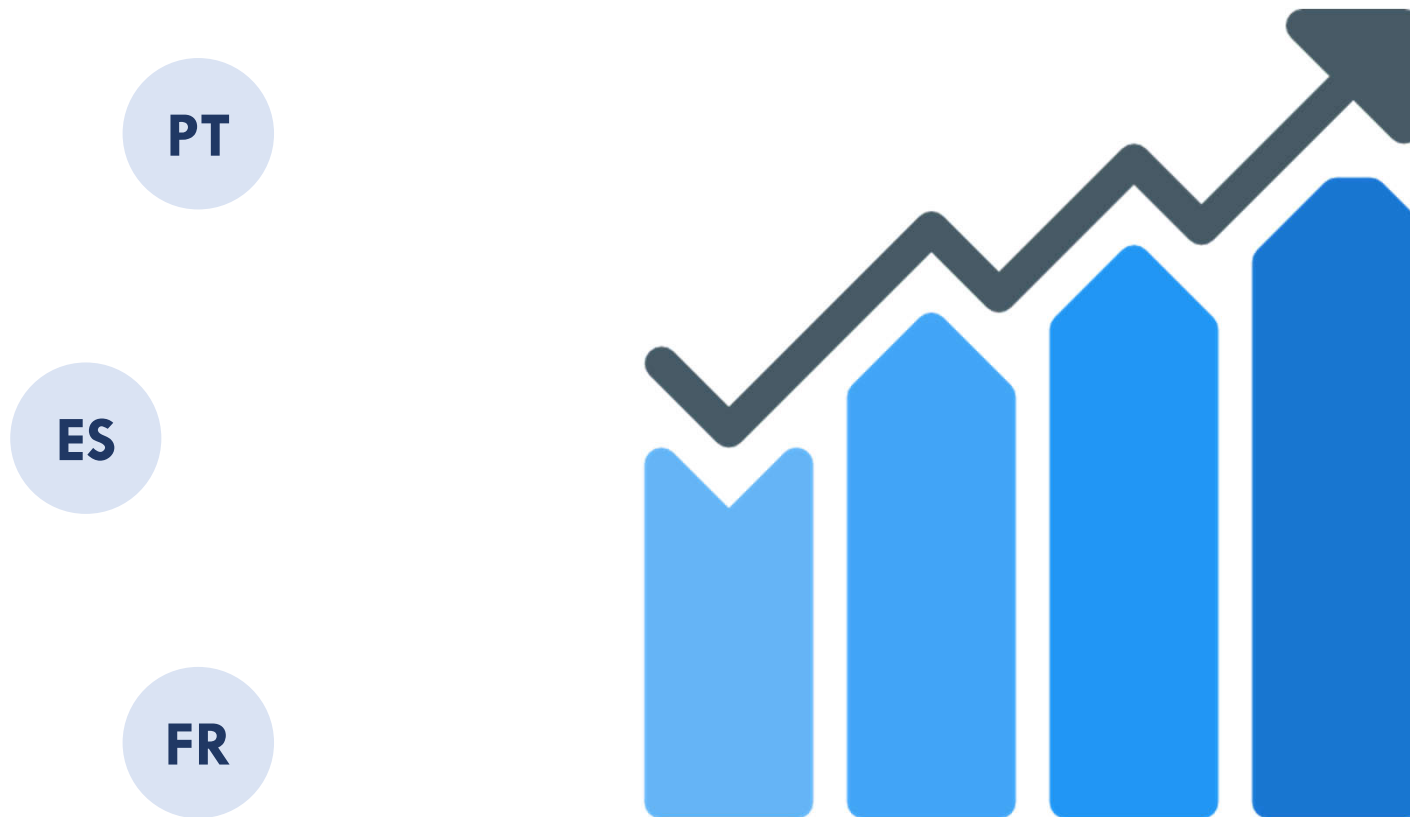

Non-specific procedures

ES

FR

How many SAR do you receive per year?

Did you implement any strategies to improve the number of notifications per year?

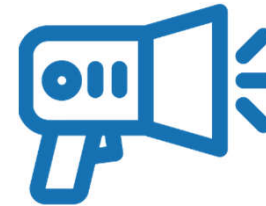

PT

Portal RAM

Registo de reações adversas a medicamentos

Awareness campaigns

ES

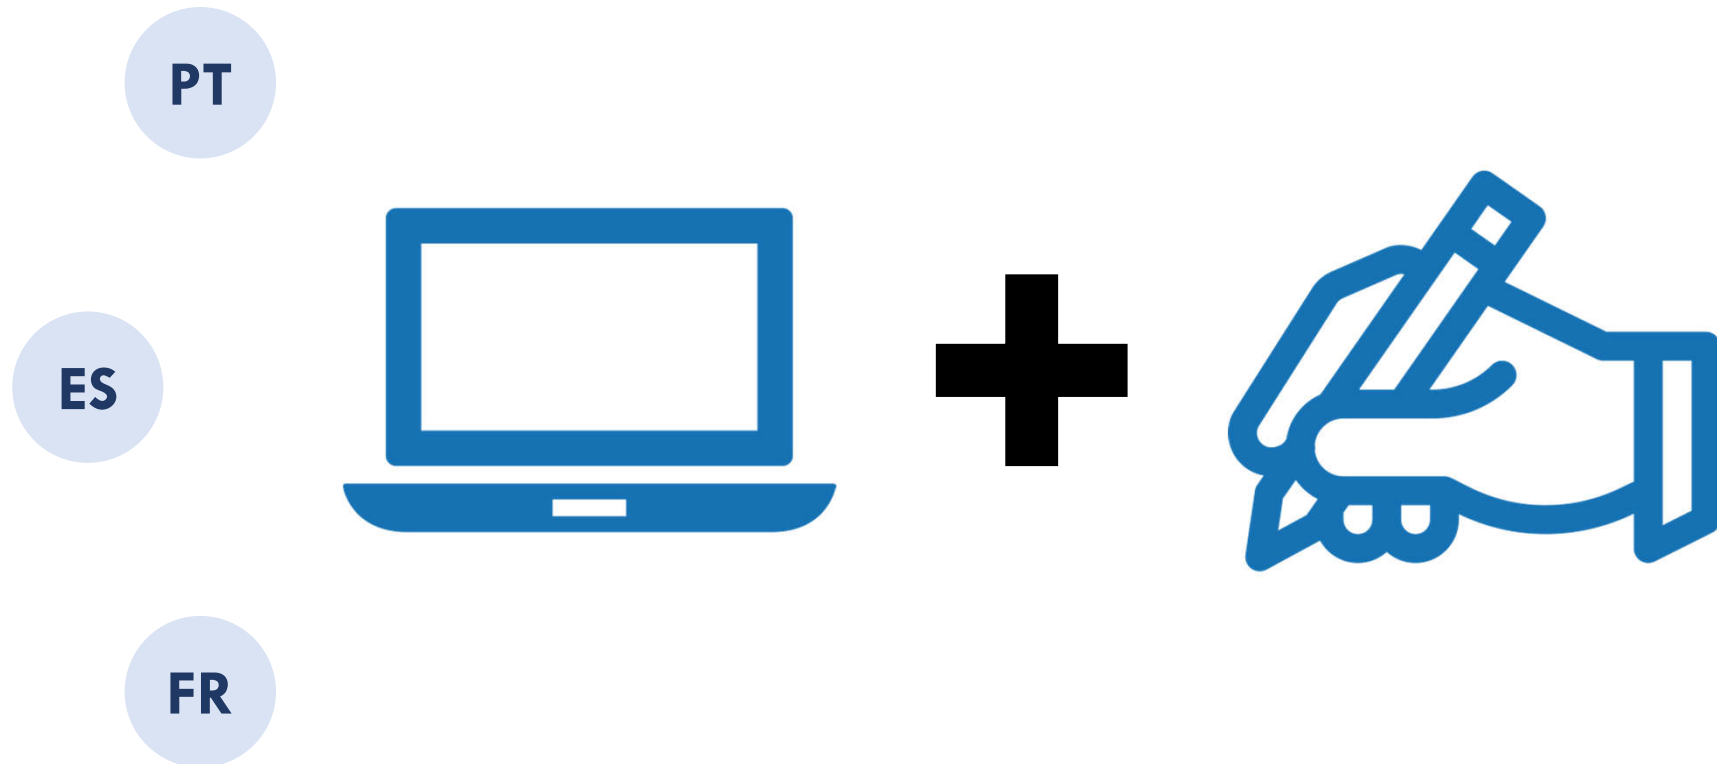

Straightforward reporting system

FR

Teaching classes

How is the information collected?

What is the main method of decision of SAR?

PT

Global Introspection

ES

Modified Karch-Lasagna algorithm

FR

French accountability score (*Bégaud B et al. Thérapie 1985*)

How long does it take from SAR notification to the end of the analysis?

What are the technologies used in your workflow?

PT

Portal RAM

Registo de reações adversas a medicamentos

EudraVigilance

ES

Regional and national databases

FR

Computerized medical records, analysis of medico-administrative databases

Do you consider that some of the procedures could be improved by using new technologies?

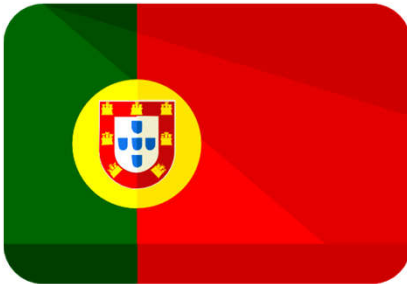

Easier reporting systems helps improving the number of notifications

Mention 3 good practices that you recommend to other PV units

1

Strong investment in awareness raising/training of potential notifiers

2

Monthly monitoring of RAM notifications

3

Active participation in European groups related to pharmacovigilance

Mention 3 good practices that you recommend to other PV units

1

To carry out periodic campaigns aimed to disseminate pharmacovigilance among healthcare professionals and patients.

2

To provide information to prescribers and patients through pharmacovigilance information bulletins

3

To improve tools to detect signals (e.g. confounding variables) from spontaneously reported SAR.

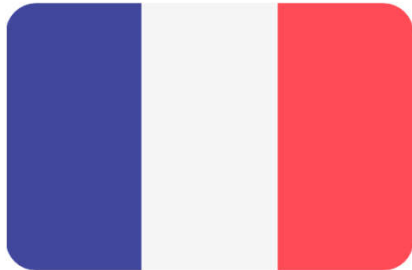

Mention 3 good practices that you recommend to other PV units

1

Have research technicians to collect and promote the notifications

2

Use smartphone apps to make notifications easier

3

Specialize a senior pharmacologist for adverse effects reports of anticancer drugs
